My Experience

"I have been afflicted for many years with Dyspepsia, Sick Headache and affection of the Kidneys caused by a Torpid Liver. During last Fall and Winter I was obliged to suspend the most of my labor in my field of Home Missionary work, on account of my health. Early this Spring I was induced to try Simmons Liver Regulator and have had more real good health than for years before. I relish my food at once, and is more satisfactory than anything of the kind I ever tried. I have also used it successfully to ward off bilious attacks."—JOSEPH L. WHEELER, Cumberland Pres. Senator Stewart's Great Territorial Division Scheme.

SAN FRANCISCO'S EXPECTATIONS

More Regarding the Advance in Lumber—A Boy Shot by his Father—Chinese Murderer Captured, Etc.

STEWART'S GREAT SCHEME.

Whereby Washington and Nevada are to Divide Idaho

SAN FRANCISCO, May —To a reporter [illegible] called on him at the Palace yesterday, Senator Stewart of Nevada explained at length his reasons for favoring annexation of Northern Idaho to Washington territory and of Southern Idaho to Nevada. As the [illegible] [illegible] probably come up at the next congress [illegible] opinion of a senator who will labor [illegible] [illegible] [illegible] that the senator's [illegible] Northern Idaho to Washington [illegible]

In the division of territory of the United States [illegible] [illegible] The formation of [illegible] valley [illegible] comparatively little [illegible] [illegible] population. In the division of the [illegible] Pacific [illegible] many instances [illegible] for deserts [illegible] There are other territories [illegible] into states [illegible] same kind of states. Nevada, Neither [illegible] Wyoming, Arizona [illegible] New Mexico [illegible] [illegible] [illegible] [illegible] a population [illegible] than either of the others named [illegible] [illegible] the United States. It can be dealt with either by [illegible] state government [illegible] surrounding states.

FIRST NEVADA MUST BE FIXED

The first matter in this connection which calls for the action of congress is such additions to Nevada as will make her comparatively equal to other states. This can be done by the consent of Nevada which has already been given and of an act of congress. Southern Idaho is the only territory available for this purpose. It is about equal to Nevada in population and the two together would make a very respectable state. Northern Idaho is needed to make Washington a good state. While Washington possesses great natural resources there is much waste land there but with Northern Idaho it would make a splendid state. Montana is already sufficient to make a first class state. [illegible] can never possess resources sufficient to be a state but [illegible] extended east 100 or 150 miles [illegible] of Dakota and Nebraska [illegible] would make a good state. If Nebraska would consent to [illegible] would be more than compensated by [illegible] north [illegible] including Southeastern Dakota. [illegible] left of Dakota to make a very large state. Arizona and New Mexico should at once be united. Colorado will never be a very large state in proportion and if Utah ever becomes a loyal territory a large portion of it might well be annexed to Colorado and the rest to Nevada. By such an arrangement all of the territory of the United States could finally be absorbed into states and all the western states would then be respectable in point of population and be comparatively equal.

"THE PORTLAND ROAD"

Opinion of a San Francisco Paper on the New Coast Line

SAN FRANCISCO, May —Today's Chronicle contains a double column article headed The Portland Road, being a history of the California & Oregon and the Oregon & California railroads, the work in progress and in contemplation and the probable effect on San Francisco and Oregon when the two roads are joined. The article begins [illegible] that the completion of the roads will mark another swinging stride toward San Francisco's commercial greatness. It will place northern California and Southern and Eastern Oregon within easy reach of San Francisco merchants and travelers and make San Francisco the [illegible] of the Northern Pacific railroad. For every dollar spent in construction of the road to feed on the California & Oregon Company [illegible] building the line northward to Hornbrook, the present terminus which is within five miles of the Oregon line. Now that the California & Oregon people have secured control of the road its prospects are brighter than ever before and the few stockholders who have had unflagging faith in its future will [illegible] the reward of their patience [illegible] [illegible] confidence in the safety of American railways as an investment.

THE COUNTRY'S RESOURCES

Only a vague idea of the good to result from the construction of the road from San Francisco to Portland can be formed unless one has some conception of the resources of the country which the road [illegible] resources which have only been partially developed and which are awaiting [illegible] of development. In Tehama county [illegible] there are millions of acres yet [illegible] and in Shasta county [illegible] In [illegible] Eastern Oregon development is [illegible] for there is made tributary [illegible] [illegible] [illegible] [illegible] transportation facilities [illegible] fisheries of the [illegible] [illegible] the immense pine belts, coal mines and cereal lands of Washington territory will be brought within immediate reach of the metropolis of the coast. What is to benefit San Francisco [illegible] the country tributary thereto [illegible] [illegible] [illegible] harvest on both the [illegible] travel.

SAN FRANCISCO, [illegible] [illegible] July [illegible] The [illegible] exchange [illegible] $15 [illegible] $35 [illegible]

The [illegible] dealers are not high when the demand is considered but are a fair figure and as low as can be made with only reasonable profit. The season north has been a hard one for getting out lumber and logs are selling for $3 more than a year ago and the cost of transportation is also higher. At north coast ports yesterday nearly fifty vessels were reported loading with lumber. Of these twelve were to go to south coast ports, twelve to San Francisco and the others had Melbourne, Sydney, Hong Kong and Valparaiso for their several destinations.

WEATHER CROP REPORT

Weekly Bulletin Issued by Chief Signal Officer Greely

WASHINGTON, May —The chief signal officer has issued the following weather crop report for the week ending May 21, 188 :

During the week ending May [illegible] the weather has been warmer than usual in all [illegible] districts east of the Rocky mountains except in Florida and Texas where the deficiency in temperature averaged about [illegible] degrees, a daily average of about 3 degrees below normal. From the Mississippi valley eastward to the Atlantic coast the excess of temperature for the week was from [illegible] to [illegible] degrees, a daily [illegible] of about [illegible] degrees warmer than usual. The excess of temperature for the [illegible] previously reported in the [illegible] of [illegible] Tennessee, Central Mississippi and Lower Mississippi valley has been increased by warm weather the past week while the deficiency of temperature previously reported for the season in the wheat and corn region north of the Ohio river and in the upper lake region, Iowa and Minnesota has been reduced, thus leaving the thermal conditions in these sections at the close of the week near the normal.

During the week there has been a deficiency of rainfall in all sections east of the Missouri and Lower Mississippi valleys while slight excesses are reported in Texas, Northern Arkansas and Central Dakota. The deficiency in the rainfall for the season is general, the only sections reporting an excess being Northern New England, Ohio, Western Pennsylvania, Northwestern Dakota, Oregon and Washington territory. The large deficiency in the rainfall previously reported in the Southern states east of the Mississippi continues.

[illegible]

In the cotton region east of the Mississippi river rain is needed but recent showers and warm weather placed the crop in a favorable condition [illegible] to the Gulf states [illegible] weather the past week has improved the crop conditions except in Northern Arkansas where too much rain is reported.

In the grain regions of the Ohio valley and in Missouri, Kansas and Nebraska the weather during the week has been generally favorable for corn and wheat.

In Michigan, Wisconsin, Minnesota and Northern Illinois the weather has been reported as favorable but crops are likely to be injured owing to the absence of rain.

In the bay regions of New England and the Middle Atlantic states the weather is reported as favorable.

Telegraph reports received this morning (Sunday, May [illegible]) show that local rains have fallen during the past eight hours in the sections where they are most needed, viz: Minnesota, Wisconsin, Michigan, Dakota and Kansas.

O'BRIEN AT NIAGARA FALLS

NIAGARA FALLS, N. Y., May 2 —To-day a deputation from Rochester headed by Dr. [illegible] [illegible] National League called upon Mr. O'Brien. From Buffalo there came Father [illegible] editor of the Catholic Union and [illegible] James Mooney, ex-president of the Irish National League of America. Many visitors from Hamilton and other points headed by several [illegible] citizens and clergymen called upon Mr. O'Brien, who remained in his room all day. O'Brien said to correspondents that although he was greatly exhausted and scarcely able to speak above his breath he was determined upon going to Hamilton to-morrow. His friends are alarmed at his decision, not because of their fear of another attack, there although such an attack is considered exceedingly probable, but because the mere journey itself and the effort of making another speech are likely to overpower him and imperil his life. It is said by some of his enthusiastic friends here that a strong bodyguard of stalwart men will be organized in Buffalo and will accompany him. Mr. O'Brien however does not approve of this as he does not think there will be any need for such a step. His friends have a positive opinion to the contrary but they will do nothing without his sanction. He goes from Hamilton to Montreal where an open-air meeting will be held and a torchlight procession organized to escort him through the principal streets of the city.

TABERNACLE TEMPERANCE MEETING

A large audience gathered at the tabernacle last evening to greet Col. George Woodford, the temperance orator of Illinois. The choirs of the several churches [illegible] came upon the platform and led the audience in singing several songs from the Gospel Hymns [illegible] Rev. [illegible] W. Caswell read the first psalm. Rev. [illegible] Alderman, D. D., led in prayer and Mr. A. M. Smith, president of the Prohibition Amendment League, in a few appropriate words introduced the distinguished speaker of the evening.

Col. Woodford read as the foundation of his remarks the account of the man sick of the palsy. The address was intensely practical, soul-stirring and at times thrillingly eloquent.

Much of the lecture was along the line of Gospel temperance. The temperance pledge was strongly advocated and all Christian and moral people as well as moderate drinkers were urged to sign. The colonel described a lady who was very much opposed to the W. C. T. U. her reason being that it was not popular with her set. Society was against it and thus she did not believe women engaged in public works. But the real reason was that she was a [illegible] [illegible] [illegible] [illegible] [illegible] [illegible] drunkard's career. Every [illegible] [illegible] before next November [illegible] [illegible] [illegible] [illegible] [illegible] next November. We have [illegible]

AMENDMENT CAMPAIGN

George Woodford, of Chicago, who was recently engaged to Oregon by the state W. C. T. U. will speak at the tabernacle every night this week, being the first of the campaign series. The Woman's Christian Temperance Union has engaged a number of speakers representing the very best talent in the [illegible]. Those who have watched the growth of the W. C. T. They are ready to recommend George Woodford as not a whit behind and in some respects superior to any who have preceded him. COM

ADVENTIST CAMP MEETING

Among the exercises Saturday at the Seventh Day Adventist camp ground the Sabbath school was one of importance as showing the increase, of [illegible] and principles of the organization. Last year at their annual meeting there were about two hundred and sixty children and adults convened. Yesterday there was a gathering of four hundred and thirty under the tent to participate in the exercises of the hour. Sabbath school among this people seems to be [illegible] great interest. Every means that can be devised to illustrate or teach the truths of the bible is brought into requisition.

In the children's department of the Sabbath school work the lessons, concerning the scriptures are divided into [illegible] separate books which consider in the [illegible] manner possible the lessons [illegible] in the bible from Genesis to [illegible]

A [illegible] has been established in South Africa, and his work is supported by the volunteer contributions of the different Sabbath schools of that [illegible] throughout the United States. The missionary spirit [illegible] [illegible] that they may give their mite to worthy [illegible] [illegible] have an interest.

Object lessons and illustrations are employed [illegible] in this teaching. The [illegible] ones and [illegible] attention and interest which they give speaks [illegible] of the [illegible] work of their instructor.

PORTLAND, MONDAY, MAY 23, 1887.

THE PEOPLE'S SIDE OF IT.

Reports of earnings of many railroads, published in New York show that since the interstate law went into effect there has been a very unusual increase of earnings A list embracing a number of the leading roads of the country shows an increase of about $3,000,000 for last month, over the usual average for the month of April. It is believed that this increase is due mainly to the advantage taken by the roads of the opportunity offered under the interstate law to make higher charges.

Hitherto the attention of the inter state commission seems to have been directed almost wholly to the fourth section of the act,—the section that deals with the long and short haul subject Concentration of discussion upon this feature of the law has so engrossed everything that the provisions of the sections preceding it, which require that all charges shall be reasonable and just, and which declare that 'every unjust and unreasonable charge is prohibited and shall be unlawful have been virtually overlooked Hence the roads, taking advantage of their opportunity, have on the whole increased their charges and their stocks, inflated, watered, dropsical as they are, are "booming" in Wall street.

The provisions of the law which enable the commission to prevent the exaction of unreasonable rates should be no longer overlooked by that body. And it is doubtful whether, in all the United States, more flagrant instances of the violation of these provisions are to be found than are presented in the Pacific Northwest.

As the law stood before the interstate act was passed—that is, at common law—if the parties to a contract for transportation did not stipulate the amount to be paid for any given service, the sum recoverable by the person furnishing the service was a just and reasonable sum But still, in the absence of specific contracts, the railroads have charged about what they wanted to, and the charges have been paid, because no individual felt equal to an attempt to enforce in the courts, as against the power of the railroads, the principle of the common law

But under the interstate law not only are the railroads prohibited from making charges that are unreasonable and unjust, but even a contract between shipper and carrier for payment of an unreasonable sum for the service cannot be enforced. Such contract is void, because it is prohibited The question as to what is a "reasonable and just" charge, in the absence of specific legislation, would be determined, ordinarily, by the courts but under the 13th, 14th and 15th sections of the interstate law, it may also be determined by the railroad commission.

This is the branch of the subject that the people now want the commission to reach So far the commission has been attending to the calls of the railroads for suspension of the fourth section It is now desired that the commission shall attend to the call of the people for enforcement of the other parts of the act What the people want to know is this, namely, when their turn is to come

LEGISLATION FOR ONESELF

The drink habit is the worst foe of labor In a recent number of the *Catholic World* this fact is set forth with great force by Rev Father Conanty, of Worcester Mass The workingman's health, strength energy and industry are his capital The drink habit not only takes off the profits of this capital, but makes inroads upon the capital itself And the same is true of tobacco, in many cases and in scarcely less degree Says Father Conanty "The workingman whose habits are not temperate is wasting his capital, is squandering every element of value that he can contribute to any enterprise so as to secure a remunerative share of profits? Even if his indulgence is moderate, he is wasting what he can ill afford to lose

Right here is the opportunity for stringent and effective legislation As in all other personal concerns, each man should herein legislate for himself That is the right sort of prohibition, and it is the only sort that can be really effective. Men who do not depend on themselves, but look to the law or lean on the law, for guidance, direction or support, act as one would who should refuse to use his legs and should take to crutches as the surer method of support and locomotion. A prohibitory law for oneself is that law of reason and of manhood an appeal to a law of the land for protection to oneself against his own follies or personal vices, is weak futile, puerile At bottom of every reform of personal habits, of every growth of the principles that underlie industry, morality, thrift, independence and manly character, is the principle of individual responsibility. Every other foundation is the house built upon the sand.

THE CATHOLIC CHURCH AND TEMPERANCE

The Catholic church is the most democratic church in the world wherever it is found It is the church of popular experiences and popular success among primitive people of the world, beyond any other Christian church Among the Indians of North America the Catholics obtained the first and to this day hold the last control Go to China Japan go to the most inaccessible regions of the world, and you will find that the Catholic church has the most converts Why? Because it comes into the closest contact with the people It is the most democratic of evangelists To illustrate The English navigators, the best seamen of the world in the fourteenth century, as they are to-day stopped, content with the landing place that promised the chance of a site where religion could be enjoyed and business transacted but there the Englishman stopped He did not proceed further under the stimulus of any desire to discover new lands for the mere glory of discovery or in order to turn the Indian toward Christ The result was that the French Jesuits who prosecuted discovery for the sake of bringing barbarian souls to Christ, utterly outstripped the Englishman as a discoverer This difference between the philosophy of the English churchman or colonist, and the Catholic voyager is maintained to-day, and the Catholic church in America is the church of the plain people more than any Protestant church save the Methodist. For this reason the methods of the Catholic church in dealing with the question of intemperance are worthy of serious consideration. In the first place the Catholic clergy talk from their pulpits on the subject of intemperance with a plainness that puts our faltering Protestant pulpits to shame To illustrate, the Rev T J Conaty of Worcester Mass a city of 60,000 people recently expressed his regret that in the list of advertisements to sell liquor that so many of his congregation appeared Rev Thomas Griffin expressed the same opinions Vicar General Byrne, of Boston, says "We do not attempt to preach total abstinence for all people under all circumstances The experience of the past proves that we cannot hope to make such a work successful For those who find that drinking is an injury we urge complete abstinence, and we say to all that a careful watch over their habits is most desirable We are not prohibitionists, as our recollection of the failure of the last prohibitory state law is vivid. Under prohibition we know that the bottle was kept in the family cupboard, where the wife and children were subjected to its temptations Rev. Thomas C Conanty, of Worcester, says

I favor a restricted high license I think the provisions of the Massachusetts license law the best of any in the country and I wish it was rigidly enforced No man should be licensed unless he is pecuniarily responsible and of something like a decent character I have no sympathy with the idea that it is wrong to discriminate against the poor man in this matter The man who has to get some wholesale dealer to advance his license money ought to be put out of the business I was so disgusted with the non-success of what I think was an honest attempt to enforce no license here last year that I was glad the city went "Yes."

We have the highest authority in our crusade against drink, continued the reverend gentleman, in the letter which Bishop Ireland bears from Leo XIII The holy father calls intemperance a "destructive vice" whose 'deplorable injury both to faith and morals is well known, He says. "We esteem worthy of all commendation the noble resolve of your pious associations, by which they pledge themselves to abstain wholly from every kind of intoxicating drink nor can it at all be doubted that this determination is the proper and the truly efficacious remedy for this truly great evil" I am ashamed as an Irishman and a nationalist when I think of the great number of our people who are engaged in the liquor trade In an article which has just appeared in the *Catholic World* I refer to the supreme folly of the workingmen who while they exclaim against the injustice of capital pay willing tribute to a more onerous and exacting master

Be sure and quote me as an advocate of total abstinence said Father Conanty in closing. I am confident all other methods of suppressing intemperance among the Irish people will fail. They don't intend to get drunk when they take the first social glass of an evening and their safety is in letting it entirely alone

FORESTS OF THE UNITED STATES

From the department of agriculture at Washington there has recently issued a report, from which we make the following extracts

The forest area of the United States seems to be less than 4[illegible] acres of which more than 10,000,000 acres yearly are destroyed by fire and to supply the needs of fuel ties lumber etc It is estimated that certainly not less than 10,000,000 acres are denuded altogether an area of over 60,000 acres per diem the product representing a value of more than $[illegible] per annum

The consumption of the forests in supplying our railroads with ties is enormous and increasing with the rapid extension of the roads It is estimated the building of existing roads has taken the available timber from an area as large as the states of Rhode Island and Connecticut and that to keep them in repair by replacing decayed ties with new ones requires annually the yield of more than 500,000 acres

In 1853 the forest area of Ohio was 5o 27 per cent of the area of the state In 1881 it was but 22 53 per cent A similar rapid consumption of the forests has taken place in other states In many cases the flow of streams has been lessened or made irregular by the removal of the forests from their vicinity Floods and droughts have become more frequent and destructive from the same cause and agriculture and manufactures have suffered greatly in consequence The consumption of the forests so far exceeds their growth that if no effective measures are taken to check the decline, the forests would entirely disappear within a hundred years The great pine forests of the Northwest will hardly last till the close of the present century

On the Fourth of July Tacoma will celebrate the completion of the Northern Pacific railroad That town is somewhat behind the times. Portland celebrated the completion of the Northern Pacific nearly four years ago, at a cost exceeding $25,000 And Portland found that it wasn't worth while to do so much to get so little—as the charity boy said when he got through the alphabet. Tacoma will find out the same thing The town has been living for years upon expectation of completion of the road over the mountains. The completion will virtually kill the town for years to come, because the reality will not equal one hundredth part of the expectation

Senator Hearst, no doubt, has plenty of money, and out of fond indulgence to his son will put it into the San Francisco *Examiner* without stint. The other day he said, proudly "My boy has none but Harvard fellows on the paper. You see he graduated at Harvard But he's mighty independent about it If they don't suit he fires them right out and sends for more Harvard men" On that basis the *Examiner* will continue for an indefinite period to absorb the paternal shekels Harvard men are well enough for a newspaper, when they're the right kind but something more is necessary for a newspaper than what is learned at Harvard, or at any other college and this is particularly so on the Pacific slope

Southern democratic papers are now becoming the most strenuous advocates we have of the doctrine of protection Journals at Atlanta and Macon, Ga., at Nashville and Chattanooga, Tenn, at Selma and Birmingham, Ala., and at Raleigh, N C, in their advocacy of the doctrine go rather ahead of the papers of Pennsylvania.

The only prohibitory law worth a groat is that which any man may enact for himself. That legislature is always in session, and it may put through the prohibitory bill without formality of committee recommendation, or of first, second and third readings

CONFEDERATE BONDS.

English Holders Send out Another Circular in Hopes of Catching a Few More Gudgeons in the United States

Americans can hardly understand that intelligent Englishmen who know anything about the temper of the United States should ever expect that the United States could assume the Confederate debt. Yet a bill was presented to the last congress which had this end in view and one of the committee of the democratic house gave to Judge Fullerton the counsel of the British bondholders of the Confederate debt a hearing upon this bill, and now a private circular issued by the British holders of this debt to their associates in the speculation has been received at Washington in which after reference is made to the argument of Judge Fullerton the following occurs

Your committee feels justified in stating that never since the close of the civil war has the position of the bondholders been so hopeful as to day Derision and ridicule have practically ceased Public opinion in the United States is now favorable to a consideration of the Confederate debt and a feeling of incalculable importance has been obtained in the United States congress Steps of an important nature are not contemplated by your committee which it is not in the interest of the bondholders at present to state but ensue is of the opinion that they will result in the committee obtaining authority from the next session [illegible] United States congress [illegible] the whole [illegible] of claims While [illegible] committee have at [illegible] under [illegible] bondholders who [illegible] for cert[illegible] the first day of [illegible] bondholders [illegible] of Southern [illegible] exchanged [illegible] no bond will [illegible] forms of [illegible] the National [illegible] the office of Confed[illegible] No 60 Cole[illegible] further information [illegible] Dated the 18th of April 18[illegible]. Increase of Railroad Rates

Idaho (Boise City) Statesman May 21

The *Statesman* received yesterday the new tariff rates on the Union Pacific and Oregon Short Line railroads that went into effect on the 5th day of April last The rates are from 33 to 50 per cent higher than the rates charged our merchants previous to April 5 For instance the charge on first class goods was $3 61 from Omaha to Kuna, and now it is $4 per 100 pounds Newspaper in bundles that cost $2 is now rated second class and charged $3 50 for 100 pounds Other goods are about in the same proportion It is nonsense for any one to pretend that there is a reduction The increased freights on the kind of goods shipped to Idaho will average the railroad company between 30 and 100 per cent. more than they did before the new tariff was laid It will cause an advance on many articles. Merchants are looking over the tariff lists from Portland and from the East to see where they can do the best on freight.

PLEURISY CURED

KINGSTON Ontario December 7 1885

Six years ago I caught a severe cold standing in an ice house with my coat off I felt myself getting chilly and went to the house where I shook for half an hour and then had high fever and terrible pain in my side and through my lungs I put an ALLCOCK'S POROUS PLASTER on my back and one on the front of my chest and in a short time the pain decreased and I fell asleep and did not wake until the next morning when I was again quite as well as ever In telling my doctor about it, he said I had been attacked with pleurisy and, possibly, pneumonia. THE COMING CHAMPIONS.

THE WILLAMETTES DEFEAT THE PIONEERS 16 TO 3 YESTERDAY.

Unless the Portland and the Pioneer Baseball clubs get new players, or a great deal better work from the present nines, the Willamettes will win the league championship without a struggle It is not likely that they will lose a single game unless opposing clubs are greatly strengthened Yesterday they defeated the Pioneers by a score of 16 to 3. In the first inning they piled up seven runs and that practically settled the game.

The Pioneers were in bad form Except in the out field, errors were numerous Greer was wild in his delivery and there was no headwork between him and his catcher Then they had no field captain, and no one to coach base runners Their batting was remarkably weak and all played without spirit With a score hopeless against them it is not to be wondered at

The Willamettes seem now to be in better trim than they were at the close of last season Their fielding is always sharp, and they do everything with confidence With the exception of two wild pitches by Parrott two passed balls by Trumbull a slowly handled grounder by Bailey and a muffed fly by Dode Parrott their play for the nine innings was ideally perfect Tom Parrott seems to improve every week and yesterday struck out seventeen men and that too without punishing his catcher Turnbull's play behind the bat is beautiful The partnership work of this battery has been the feature of the sport at The Oaks this season Timmons made his debut as an umpire with great success Only once was there a kick against his ruling Following is

VISIT OF A NATURALIST

WHAT PROF WARD SAW OF INTEREST IN WASHINGTON AND OREGON

Prof Henry A Ward proprietor of the natural science establishment at Rochester N Y who arrived here overland from California about a month since leaves for the East this morning by the boat to The Dalles Since his arrival he has visited every institute in this state and Washington territory and also visited Victoria.

The first place he visited was the state university at Eugene where he met Prof. Condon and inspected his famous collection of geological specimens He says it gave him great pleasure to meet, immediately on his arrival in this state a man so well informed in regard to its natural history He considers that Prof Condon compares very favorably with first-class geologists at the East and that his collection is very fine and is a credit to both Prof Condon and the state Owing to his modesty and unassuming nature he does not get the credit he deserves

Prof Ward expressed surprise that a thorough geological survey of this coast has not been made A great amount of knowledge in regard to this matter has been accumulated by Prof Condon which unless means are taken to preserve it will be lost when he dies as he has published but a small portion of it

Prof Ward says that the state should establish a museum where should be collected Indian relics found here Many Eastern states now regret that they did not secure relics of the fast vanishing races which once peopled them which increase in interest and value every year There are a number of fine collections of these relics in the state which should be secured and preserved in a state institution before they are otherwise disposed of With these should be a complete representation of the minerals and fossils of the state

Prof Ward says that the next best collection to that of Prof Condon which he has seen during his visits to this section was at Seattle He was much pleased with the beautiful collection of shells belonging to H E Dore of this city, and especially with their correct scientific arrangement. He visited the collection of Indian relics belonging to Mayor Raffety of East Portland which he considered very interesting and Prof. Everette's collection of Alaskan curios If possible he will stop at Umatilla to inspect Mrs J H Kunzie's collection of Indian relics which is probably the finest in the Northwest He met Prof. O B Johnson of Seattle Mr Jas G Swan of Port Townsend Dr G W Taylor of Victoria and many others In fact he had on his list nearly every person in the Northwest who has a collection in any branch of Natural History

While in California Prof Ward sold to the Academy of Sciences there a $16,000 collection of natural history specimens His visit to this state was for the purpose of ascertaining what encouragement there would be for him to bring a collection here to display as a free exhibition on the chances of disposing of it He found a larger city more wealthy men and a more intelligent community than he expected He was much surprised and delighted with our High school building which he says is finer than anything of the kind he has seen at the East. However owing to the number of calls made on our people this season for various charitable and other purposes he has abandoned his project for the present but will carry it out perhaps next year

COLLAPSE OF A BRIDGE.

THE HIGH WATER ROAD BETWEEN PORTLAND AND VANCOUVER IMPASSABLE

Early yesterday forenoon a very large section of the long bridge crossing the Columbia slough on the Portland Vancouver road collapsed This bridge was constructed about two years since Multnomah county bearing the expenses of the labor necessary and Gen Miles furnishing the lumber The bridge is about one and one-half miles in length and it is said nearly three-quarters of a mile has gone down In putting the bents up it appears that some of them were not placed exactly in a perpendicular position or else the foundation had yielded for owing to one or the other cause or to both the whole section (the end nearest to Love's slough) careened endwise and went down The collapse reminded one of a long row of bricks where one falling would upset all the rest Fortunately no one was [illegible] I seen the government mail wagon had just passed over that portion of the bridge going to and Vancouver a short time prior to the collapse Very soon after a soldier passed along on horseback going toward Portland and was caught in the fall However he escaped without injuries although his horse was pretty badly scratched and bruised by getting jammed between the falling planks

In point of depth the water in the slough along the course of the collapsed bridge ranges from a foot to ten feet Bents timbers and plank road way all rest in the mud and water in a somewhat confused condition To raise the bents and place the bridge again in position will require much labor and a considerable outlay It will be very difficult if not wholly impracticable to restore the bridge to a condition for travel until after the June rise Already the water has covered the bed of the slough and is constantly deepening, so that probably nothing can be accomplished until after the subsidence of the flood There is the old route where the stage formerly ran before the completion of the bridge and as it passes over rising grounds vehicles and horsemen can still travel to and fro but that is threatened with early inundation at the present rate at which the Columbia is coming up Yesterday the supervisors were notified soon after the accident occurred and visited the scene What conclusion was arrived at with reference to repairing the damage is not known at present

The collapse carried down the Western Union Telegraph Company's line for the entire distance The wires were strung along on the end of the timbers and naturally went along with the rest John Crouch and several men were engaged yesterday for some hours in restoring the interrupted communication This was done by stretching wires around the breaks following the course of the old road

WEATHER REPORTS

THE ASSOCIATED PRESS TO SUPPLY A WANT NEGLECTED BY CONGRESS

The following instruction was received last night by the agent of the associated press in this city

NEW YORK May 22—To Agents of the Associated Press at all Distributing Points —The chief signal office of the United States army asks for the assistance of the associated press in supplying data for a more thorough weather report You are hereby authorized and instructed to supply the observers of the signal service at your respective cities with copies of dispatches received relating to storms rain droughts etc, these facts to be supplied at the same time dispatches are supplied to the newspaper It will be your duty in each case to exact from the observer a promise to use such dispatches for the benefit of the signal service only and in a confidential way

The war department is to give the associated press credit for the co-operative work The necessity for it has grown out of the failure of congress to make a sufficient appropriation for carrying on the department I am sure that the press is sufficiently patriotic to aid the government in this respect WM HENRY SMITH

MONEY IN BUGS.

HOW A LAMP CLEANER PAYS HIS BARBER'S AND CIGAR BILLS.

Last summer a San Francisco entomologist visiting this city struck a bonanza in the electric lights along the streets. He followed the man who trimmed the lamps around every morning and secured a large number of specimens, some of them rare. Yesterday a reporter ran across the "lamp trimmer" at his work and inquired how the bug crop was this season.

"It's rather poor" was the reply. "There are a good many of the beetles, but very few of the moths and other things." He was lifting the glass globe from a lamp as he spoke, and, a moth being seen in the pan at the bottom, he drew a paper box from a compartment in the leather satchel in which he had his carbons and placed the insect therein.

"So you have turned collector yourself," said the reporter.

"Oh, I save them for some parties who are interested in bugs," said he. "There is a barber up here who does my shaving for some of the bugs, and there is another fellow who keeps me in cigars for specimens."

So it will be seen that even beetles and moths have a value in this city.

BRIEF MENTION.

Straw hats latest at Kohn's.

The town is being billed for M'lle Rhea.

Standard shirts 50 cents, at Kohn's for to-day only, corner Second and Morrison streets.

The best way to lose money is to fail to buy in Sellwood before the "boom" catches on up there.

Dr. Gilbert will give his very amusing lecture on "Humbug" free, to-night, at his hall, corner First and Taylor streets.

It is reported that R. M. Riner who was awarded the contract for the Tanner creek culvert has sold the contract to Bays & Jeffery for $1,600.

The National Academy of Design recently conferred the second prize of the composition class upon Henry Epting, formerly of this city.

F. T. Merrill has sold thirty-eight bicycles already this season. This good weather sells about three per day. He sells for cash or installments.

Be on hand in time to-day at Meier & Frank's for full size satin coaching parasols, all colors, $1 each, and 40-inch ecru etamine scrim at 8 cents per yard.

The W. C. T. U. will hold its regular weekly meeting in their hall to-day (Monday) at 3 P. M. A full attendance is desired. Reports from the state convention will be given. All friends to the cause cordially invited.

An alarm was turned in at 10:45 yesterday forenoon for a slight fire in the kitchen of the St. Charles restaurant, caused by the upsetting of some fat on the range. The damage was nominal and will not interfere with the business of the establishment.

The painters, kalsominers and paper-hangers, of Portland and East Portland, met at Good Templars' hall, yesterday at 2:30 P. M., to organize a union. Permanent organization was effected under the name and style of Painters' Journeymen's Protective Union.

Work on the construction of the new mill of the Columbia River Paper Company is to be pushed with vigor. Men are quarrying the stone, the mortar is mixed, the brick will be on the ground to-morrow and every effort will be used to hasten the work to completion.

Saturday morning the river was 14 feet above low water mark. At 6 o'clock yesterday morning it was 15.3 feet and at 3 P. M. 15.6 feet and still rising. Teams were at work in several places hauling wheat, potatoes, etc., from lower wharves, which will soon be submerged if the rise continues.

The work of excavating for the foundation of the county armory is being pushed vigorously, the contractor, Mr. Joseph Smith, having over twenty men and teams at work. There is over 5000 cubic yards of earth to be excavated and it is expected that the stonemasons will begin work in fifteen days.

A new cable has been laid for the Jefferson street ferry 2,200 feet long. The other cable was disabled by a break near one end and leaving a piece 1,000 feet in length which will be laid to-day or to-morrow for the ferry at Sellwood. The residents of Sellwood will soon have a multi-plenty of ways for reaching this city.

For completeness of arrangements and a thorough execution of the same, the brick layers' excursion yesterday was one of the most enjoyable of the season. Mr. John Ring, the well known brick layer, marshaled the parade from their hall to the boat. The body made a fine display with aprons and every man in line was disciplined.

Hood's Sarsaparilla is a peculiar medicine, entirely different from any other. Try it.

A PROSPEROUS ESTABLISHMENT.

Owing to push and enterprise exhibited at Garrison's sewing machine store, the business has increased so as to render it necessary to provide increased facilities for reaching patrons. Accordingly an order for a more perfect vehicle was given Blake & Aten, carriage makers, to supply the want and they have acquitted themselves with credit and dispatch by turning out one of the handsomest rigs for the purpose intended ever seen in our city and which opened the eyes of all as our friend Garrison, the manager, drove around with it on Saturday. This magnificent turnout has the further merit of being entirely of home production. Messrs. Bennett & Farvey laid themselves out on the harness, which is profusely decorated with the five-point golden star, which is the trade mark of the establishment; and Messrs. Berger & Waddell were the artists who painted the large star with radiations and a Domestic sewing machine on the back of the curtain. The Domestic and Household, the leading machines of this old established house, are now selling more rapidly than ever and M. A. Wynne, the proprietor, may well look to the future with confidence of further success, so long as the present judgment and energy is brought to bear on the business.

DIVING APPARATUS.—T. K. Johnson has received from the east the latest improved submarine armor, and is ready for services at short notice. Address Skamokawa P. O., W. T., or telegraph office, Oregon.

It is a positive relief after boarding at various "hasheries" around to drop in to the New York restaurant and get a good square meal.

ADVICE TO MOTHERS.
Mrs. Winslow's Soothing Syrup should always be used for children teething. It soothes the child, softens the gums, allays all pain, cures wind colic, and is the best remedy for diarrhea. Price 25 cts. a bottle.

Four First Premium Medals Awarded at Exhibitions
HUSBAND'S CALCINED MAGNESIA. More agreeable to the taste and smaller dose than other Magnesia. For sale at druggists and country stores, in bottles only, with U. S. Gov. Registered Label attached, without which none is genuine.

LOCAL AND GENERAL.

SHRUBS AND FLOWERS.—The effect of good taste and judgment in selecting trees, shrubs, etc., for decorating grounds around residences can be seen while strolling around town. What a wealth of beauty there is in a Wisteria vine, loaded with its clusters of flowers. What a fine show a big bush of snowballs makes, and how beautifully it contrasts with a red hawthorn, which, with its glossy green leaves and myriads of blossoms is a joy to all beholders. A row of horse chestnut trees around Wm. Pfunder's place, on C street, are a sight to be admired, with their wealth of bloom. Even the despised Scotch broom, with its bright yellow flowers, is beautiful when placed so as to contrast with the shrubbery. In Judge Lewis's garden, at the corner of Third and College streets, is quite a curiosity in the shape of a hawthorn tree, which has on different branches red, white and pink flowers, the effect of budding. The first roses of the season grown in the open air attained fullness of beauty within the past two days, but only in the gardens of those who cultivated them with care and intelligence, and the queen of flowers is just as beautiful and as fragrant as she was last year. Peonies have been in full bloom for a week, but opened so rapidly under the influence of the sun's heat after the long rainy season that the handsome crimson leaves soon fell off. By the last of this week the lovely lawns of Portland will be almost at their best, a delight alike to owners, the public in general and visitors.

SEWERAGE FOR SOUTH PORTLAND.—The scheme devised by Councilman Fliedner for sewering that portion of the city between Lincoln and Porter streets is being received by the residents of that portion of the city with much favor. It has been a difficult and expensive matter to get sewers from the streets in that section through the river bottom, which is private property, where no streets are opened. Mr. Fliedner's scheme is to construct a large box sewer from Hood street, where it crosses Marquam's gulch to the river. This will carry off the water of Marquam's creek and prevent the nuisance of stagnant pools in the bottom all summer. Then from Lincoln street on the north and from Porter on the south a large sized terra cotta or cement sewer will be laid along Hood street emptying into the box sewer at Marquam's gulch. Sewers in Lincoln, Grant, Sherman and all the other streets as far south as Porter can then be constructed emptying into the large sewer in Hood street, and thus the expense and trouble of extending each sewer across the bottom to the river avoided. Ordinances were introduced at the last meeting of the council to carry this plan into effect, but they will not be pushed through, as in case Mr. Fliedner is not re-elected he desires that his successor shall have a chance to pass judgment on this scheme.

DISAPPOINTED IN THE METAL.—A gentleman arrived here not long since from Southern Oregon, and called at THE OREGONIAN office to make inquiries concerning the prospects for disposing of a large amount of platinum. He had seen several paragraphs in THE OREGONIAN concerning inquiries from the East about this rare and valuable metal, which is now in great demand and is worth about as much as gold. He was referred to Joe Fisk, to whom he stated that he had a thousand pounds of platinum. The idea of anyone having such an amount of this valuable metal surprised Mr. Fisk, who, however, told the sanguine gentleman to send along a sample, and if it proved to be as represented, it was a bonanza, as heretofore he had only been able to procure a few ounces at a time. The gentleman sent for a ten-pound sample, which on arrival was examined, and proved to be not platinum, but titanium, quite a different metal and of no particular value. Of course the gentleman was greatly disappointed, but he still hopes to find a big lot of platinum and make his fortune by so doing.

LATER MAIL COLLECTIONS.—Postmaster Roby informs THE OREGONIAN, that commencing to-day the collection of mail matter from boxes on First and Front streets, between and including Salmon and C, will be made hereafter at 2:30 P. M. instead of 1 P. M., as heretofore. Collections on Morrison street, from Front street to the postoffice, will also be made at 2:30 P. M. Mail collected as above will catch both the Atlantic express and the O. & C. train; a special messenger having been provided by the O. R. & N. Co. as stated in these columns a day or two since, to take the mail from the postoffice at 3:30 sharp, at which time the mail will in future close.

OPIUM SMUGGLING.—One Kelly, who is well known to be engaged in opium smuggling, stated to a party here a few days since that a shipment of $45,000 worth of opium had just been sent from Victoria through this city to San Francisco. The customs officers on the Sound were about three days too late in getting track of the shipment, and Mr. Kelly is of opinion that some of the officials over there are "standing in." There are others who have a similar opinion. It is quite certain that persons regularly engaged in opium smuggling are located in this city to attend to shipments made by confederates on the Sound.

THE CYCLISTS.—Some twenty wheelmen, composed of Salem, Polk county, and Portland riders, started for a run to Vancouver and return yesterday. The road was very dusty most of the distance, but they seemed to enjoy their ride just the same, and there was not an accident during the day. While in Vancouver they made several runs through the barracks. After their return last night, they were banqueted at Allsky's by F. T. Merrill. This makes the second time that Merrill has entertained the visitors since their stay here, the first and last nights. They return to Salem to-day.

NO DEMAND FOR STOCK CATTLE.—Cattlemen complain of lack of demand for stock cattle. But few comparatively have been driven out of the Willamette valley this season and there has been no call made on the ranges of the Inland Empire to furnish cattle for replenishing the depleted ranges of Montana. This will have the effect of making beef more plentiful here in the sweet by and by, which may cause it to be cheaper, a consummation to be much desired.

MEETINGS TO-NIGHT.—This evening the Fourth of July committee and the Gentlemen's Driving Club meet at the city council chamber. The former being the smaller body in numbers, will probably occupy the committee room. Both meetings are for the purpose of hearing reports from the canvassing committees who were out last week "passing the hat," one for funds for a celebration, the other for sprinkling the White House road.

CLERICAL ARRIVAL.—Rev. Jesse C. Taylor, an Episcopal clergyman from Baltimore, Md., reached Portland yesterday by way of the Short Line. Mr. Taylor is much impressed with the verdure and beauty of Oregon in contrast with the wide and dreary sagebrush plains to the eastward. He is to have charge of the Episcopal churches in Oregon City and East Portland, and says "he has come to stay."

DEATH OF A PIONEER WOMAN.—Yesterday morning Mrs. Lydia E. Cissna, the wife of John C. Cissna, died in this city of typhoid pneumonia, aged 60 years. She was a sister of Mrs. Lucy M. Mead and was a resident of Portland since 1850. The funeral takes place to-morrow at 3 P. M., from Trinity Church.

A CRAZY TEA.—In another column will be found the announcement of the San Greal Society of the First Presbyterian church of a new form of entertainment. Whether the tea will be crazy or the service crazy we are not informed.

MADE A FOUL HIT.—About 12 o'clock last night an intoxicated baseball player struck a Chinaman on Stark street. The enraged Mongolian drew a big knife and gave chase to his assailant, who made a home run up First street and sought refuge in Dekum's block, the Chinaman crossing the home plate about two feet behind the ball tosser. Another baseball man who was sober overtook the Chinaman just in time to knock him down and save his friend's bacon. The Chinaman is sorry that his knife was not a few feet longer, and the baseball man will leave Chinamen alone in future unless he has his bat along.

POWDER FROM SAWDUST.—Timber is becoming valuable in Oregon, but is likely to become still more so, as a method has been discovered of making powder from sawdust by treating it with a mixture of sulphuric and nitric acids. It is then pressed into cartridges. The instantaneous production of gases in explosion renders this "wood powder" a rival of dynamite. There is a great future for some of the densely wooded "agricultural lands" of the Northwest. All the settler has to do when he saws down the trees is to save the sawdust, treat it with acids and use it to blow out the stumps.

ACCIDENT ON THE ROAD.—The plank road out near the south city limits will have to be made wider, or people who go out to speed their horses will have to be more careful. Yesterday a collision took place through carelessness or a shying horse, by which one buggy was upset and a horse injured. The report that the accident was caused by some one being the worse of liquor is denied, but from the number who go out on the White House road and the speed at which they drive, it is wonderful that more serious accidents do not occur.

BLACK SAND MACHINE.

The secret of saving the fine gold contained in black sand has at last been discovered. Probably no other invention relating to gold mining has cost so much of late years, both money and inventive genius as some sure and cheap method of saving the particles of fine gold found along the coast and the river bars. John S. George, an old an experienced miner, has for several years been experimenting with different plans, confident that in time he could succeed, where others had so signally failed. Like many inventors, Mr. George persevered until his means became exhausted, and but for the timely aid of James W. Brasfield, who enjoys a wide reputation for enterprise, and who had already seen the necessity of a fine gold amalgamator in working his own extensive black sand mine south of Alsea bay, Mr. George's machine would to-day be the ridiculed fancy of some dreamer. Mr. Brasfield had tried a number of gold-saving inventions and paid dearly for his experiments, as none of the many tried proved of value, there being always a discouraging loss of fine gold. Mr. George has been several months testing his machine, and now the firm, Brasfield & George, simply ask the opportunity of proving everything claimed. This is no humbug or scheme to bilk someone, but an invention of real merit, within the reach of everybody who realize a loss of fine gold in working a mine of any kind or character.

[Extract from OREGONIAN, May 16.]

PARADISE SPRING FARM.

WHAT AN "OREGONIAN" REPORTER LEARNED IN AN INTERVIEW ON SATURDAY.

"Can you afford, at the price asked per lot in your tract, to erect and give away six hard-finished houses as you advertise," asked an OREGONIAN reporter, as he entered the office of Hennelly, Flynn & Co., last Saturday afternoon.

"Yes, we can," replied Mr. Flynn, as he invited the inquiring pencil-pusher to take a chair; and, furthermore, we propose to do it. We awarded the contract yesterday afternoon to Mr. G. H. Wiser for the erection of six houses on the place at a stipulated cost of $1140 each, and they are to be ready for occupancy by the 10th of July. These houses are modern-design ground floor cottages of the most approved style, and will contain bay window parlors, connected with sitting room by folding doors; also two large well-lighted bedrooms, bathroom, dining-room, kitchen, pantry, closets, hallway, etc. They are to be hard finished and painted throughout, and the last one will be ready for occupancy by the 10th day of July. In addition to the above, there are two very good houses now on the premises, which will also be given away with the lots, making eight houses in all, or two more than we have advertised."

"Is the land level?"

"Yes, every foot of it is level and in actual cultivation with fruits and berries, and if it were not so, we certainly would not furnish free carriages for its inspection. We have 170 lots in the tract, and we will agree to give $125 cash for the most undesirable lot in the whole number, either before or after the drawing, as the purchaser may elect."

"I thought you had 288 lots?"

"We supposed we had that number, but after a careful survey of the property under the supervision of D. W. Taylor, we found after dedicating streets that we had but 170, so the purchaser, instead of having six chances out of 288 of drawing a house with the lot, as advertised, will have eight chances out of 170."

"Then your profit in the matter will not be as large as you anticipated?"

"No; we do not expect to make a fortune out of the sale, but we intend to keep faith with the public, even if we do not make one dollar out of the investment. Right in this connection we might say that a great many stories have been advanced by malicious mossbacks, who decry everything that tends to leave them in the shade—where they belong—about the amount of money we make out of the enterprise. And for their especial benefit, as well as for the enlightenment of the public, we will state that we have in this matter assumed a $34,000 risk to make $4000, and in doing so, we have afforded men of moderate means a chance to acquire a home in a locality where it could never have been accomplished otherwise. We have 26 acres in this Paradise Spring Farm tract for which we have paid $800 per acre, or a sum total of $20,800, in addition to this we expend $6840 in the erection of six hard-finished houses, $1500 for advertising, $360 for attorneys fees, $200 for surveys and maps, and $300 for carriage hire, which makes a total of $30,000. Out of the sale of 170 lots at $200 each we will realize the sum of $34,000, which affords us a profit of $23 per lot or $4000 more than our expenses, and we wait ten months for our money without interest."

"That appears to be a very candid statement."

"Well, that is the way we do business. We have nothing to conceal in the matter, and we might add that if any of our competitors can do any better by the public we would like to have them do it. Some indirect intimations have been made by wholly irresponsible curbstone real estate fakirs who don't own one foot of land, to the effect that land could be purchased in that vicinity for less than $800 per acre, and for their benefit we will state right here that if they or any of their friends have any land in the same locality, either east or west of Paradise Spring Farm, fronting on Mount Tabor avenue, with advantages equal to ours, we will take every foot of it at the same price."

"That certainly ought to settle all disputes about the value of the land," remarked the reporter as he prepared to take his departure.

"If you don't think it does just call on W. S. Ladd, who owns 400 acres adjoining our property, C. M. Wiberg, who owns an $8600 residence across the street, Wm. Beck, president of the Morrison Street Bridge Company, whose home adjoins Paradise Spring Farm, or in fact any one owning property fronting on Mount Tabor avenue, and if you can purchase land in that vicinity for less than $850 an acre we will make it an object for you to do so."

"When is the award of houses to be made?"

"On the evening of the 13th of June, at the New Market theater, without fail. As some question has been raised about the intrinsic value of these lots, we will state right here that we will give each and every purchaser the sum of $25 cash for the option of taking the lot he may secure, at any time within twelve months for the sum of $200. Thus you see we guarantee each purchaser a sum equal to about 15 per cent. on the investment, and that too on property which he has not yet paid for."

"That seems to be a pretty liberal offer to make," remarked the reporter, as the thought of investing suggested itself.

"Yes it may seem like an extravagant offer, but when you take into consideration the indisputable fact that Portland's present population will double within the next five years, and that the masses will be obliged to seek homes on the east side of the river, we think you will find it a very safe proposition, and we have no hesitancy in making it."

From the above statement it will be seen that our profit in the enterprise, while comparatively small, is of a collective rather than an individual nature, coming as it does from the many rather than the few. In other words, by disposing of 170 lots in one body, we are enabled, through the collective profit arising therefrom to make terms to the many which we or no one else could offer to the individual. We sell these lots at $200 each, $50 of that sum to be paid at time of subscription and the balance in monthly installments of $5 each, without interest. We give each purchaser a good and sufficient bond for a deed in the sum of $400, warranting the title to be perfect, and everything as represented, or the money will be refunded, on application at our office.

As only a few of these lots remain unsold, remittances will not be received after June 1st from the interior, except with the understanding that we reserve the right to reship at sender's expense.

Parties in the interior desiring to invest in Paradise Spring Farm should notify us by mail or telegraph before sending money, in order to save unnecessary expense. All those who have spoken for lots in the above named tract will confer a favor by calling at once and acquainting us with their conclusion in the matter, as we wish to avoid any misunderstanding about priority applications.

CARRIAGES leave our office every day (Sundays included) at one and three o'clock, for the free inspection of the property. We ask no one to buy before satisfying themselves that Paradise Spring Farm addition is all that we claim for it.

COMMENCING YOUNG

Ashland Paper

A number of schoolboys attending the South district school were given several bottles of beer last Tuesday by some campers near the schoolhouse, and a half-dozen of them drank to intoxication There was much indignation in town over the matter, and officers of the law were sent to arrest the men from whom the boys obtained the liquor It was thought at first that they had purposely made the boys drunk, but they declared that they had thrown aside several bottles of sour beer, and that the boys came and took it without any solicitation from them. As this was corroborated by some of the boys, the men were not arrested.

SHIPPING INTELLIGENCE

SHIPPING NOTES

The British ship Earl of Dalhousie [illegible] made a run of 101 days from [illegible] [illegible] capsized while being towed in San Francisco bay

The British ship River Ide has been telegraphed as taken for coast coal loading, but a late advice says that that charter has been cancelled and that the ship will load lumber at Burrard inlet for San Diego bringing lumber into the United States from British provinces and paying duty of $2 or more on it shows that prices for lumber must be remunerative The boom in Southern California is a great help to the lumber trade

The subject of overloading coal vessels has been brought up again this time by the San Francisco *Examiner* It is one that needs attention but that "it is the opinion of humane people generally that the underwriters should not insure a ship carrying a cargo above her registered tonnage" to quote from the article may well be doubted The *Examiner* is said to employ as writers only Harvard graduates and one of these must certainly have committed the blunder of assuming the registered tonnage to be the full carrying capacity, where safety is considered

DR. JOHN BULL'S

Smith's Tonic Syrup

FOR THE CURE OF

FEVER and AGUE

Or CHILLS and FEVER,

AND ALL MALARIAL DISEASES.

The proprietor of this celebrated medicine justly claims for it a superiority over all remedies ever offered to the public for the SAFE, CERTAIN, SPEEDY and PERMANENT cure of Ague and Fever, or Chills and Fever whether of short or long standing He refers to the entire Western and Southern country to bear him testimony to the truth of the assertion that in no case whatever will it fail to cure if the directions are strictly followed and carried out In a great many cases a single dose has been sufficient for a cure and whole families have been cured by a single bottle with a perfect restoration of the general health It is, however, prudent and in every case more certain to cure if its use is continued in smaller doses for a week or two after the disease has been checked more especially in difficult and long standing cases Usually this medicine will not require any aid to keep the bowels in good order Should the patient however require a cathartic medicine after having taken three or four doses of the Tonic, a single dose of KENT'S VEGETABLE FAMILY PILLS will be sufficient Use no other

SPRAGUE NOTES

SPRAGUE May 21

Johnny Ireland a lad 14 years old of Pasco the other day picked up what he supposed was an empty cartridge shell and commenced to drive it on the end of a stick when it exploded proving it to be a giant powder cap The explosion shattered his left hand driving two of the fingers into his leg which were removed by Dr Burton.

The prospect for a bountiful crop, in this Lincoln county is most excellent at the present time The cool weather has been beneficial in causing the grain to take firm root and spread out, and now that the days are getting warmer the grain is taking an upward shoot and it will the more easily withstand a drouth however the soil is moist enough to insure a crop without any additional rain

W B Kelly met with a painful accident this afternoon that came near resulting fatally He was removing a stove from the upper story of the Masonic temple unassisted and in descending the stairway he made a misstep and fell the remainder of the distance some six or eight steps with the stove falling on top of him For a time it was feared he was fatally injured but under the skillful treatment of Dr Ouds he is doing nicely

Immigrants are steadily coming in and a pleasant feature of the same is that they are a very desirable class men of some means and energy and men who intend to make this their home The result of the immigration has been a decided increase in the value of real estate both in Sprague and the country adjoining. The railroad shops have increased their force to their full capacity and that has an appreciable effect on the value of property here causing a demand for more houses and stirring the business circles to renewed activity

Red Cross Lodge No 28 Knights of Pythias was instituted here last Saturday night by Deputy Grand [illegible] Hill of Colfax with twenty three charter members Visiting brothers from Colfax Mis[illegible] and Spokane Falls were present [illegible] the installation of officers The officers installed for the present term are A Beamer C C [illegible] V C J W Scutt[illegible] P [illegible] [illegible] K R S W K Shaeschor? A little unpleasantness [illegible] occurred at Sedalia in this county on Thursday between George Long and [illegible] over a road matter A feud has existed between the parties over this matter for some time and culminated last Thursday in an open row [illegible] Long [illegible] his watch as he [illegible] was passing by and [illegible] when Mrs Long [illegible] with revolver in hand to assist her husband [illegible] assisted Long, it [illegible] more interesting but [illegible] others [illegible] upon arriving at the scene [illegible] she [illegible] deliberate aim at Long and shot [illegible] the handkerchief tied around his neck [illegible] call and beat [illegible] would admit [illegible] and wife arrested and the [illegible]

The Sisters of Charity have their new three story school in complete running order with an attendance of nearly one hundred [illegible] The structure is an ornament to the city and they merit praise for their enterprise The result has been such, however [illegible] them in further improvements they have just completed in addition to their church [illegible] giving it a seating capacity of five hundred [illegible] they have also purchased a block of land adjoining the school on which they propose to erect a four story hospital this summer The sisters at a recent fair cleared eight hundred dollars [illegible] a very respectable showing The ladies of the Episcopal church cleared fifty dollars at a very pleasant sociable on last evening, but the most pleasant social affair is advertised for by the Daughters of Rebekah to take place on the evening of the 26th. They are making very elaborate preparations and it promises to be the affair of the season
